Sponsored By:

Michigan Plumbing and Mechanical Contractors Association and the State Board of Plumbing. ASSE Certification is included.

Instructor:

The Seminar will be conducted by MPMCA instructor Martin Jipson with 30 years of experience as a licensed plumber, retired Inspector, and ASSE certified Backflow tester.

Class Content:

Overview of the problem of cross connections. Review of case histories, causes, health hazards. Study of Department of Environmental Quality Rules, and Michigan Plumbing Code with regard to the protection of the Potable Water Supply. Review of American Society of Sanitary Engineering guide for the proper selection and use of backflow prevention devices. Description of the eight different ways to prevent cross-connections. Detailed study of backflow preventers. Class instruction will include the use of films, and review quizzes to reinforce the message of the instructor.

Hands-on experience with various backflow preventers. Students will learn how to spot problems and how to correct them. Instructor is on hand to answer questions or help solve any problems that may arrive during the hands-on practicing experience.

Detailed instruction on varieties of backflow preventers by factory representatives of the various manufacturers. Representatives from the following companies will conduct mini-seminars on the intricacies of testing and repairing their particular devices: Balfrey & Johnston (Zurn-Wilkins), Dave Watson Associates (WATTs, AMES & FEBCO), Mid-West Instrument (Test Equipment), and BAVCO.

For those interested in becoming ASSE certified this class requires applicants to have five years' experience in plumbing, pipefitting, lawn irrigation, water purveyor, sprinkler installer, or related field. The instructor will begin the class at a level that requires all applicants to have basic knowledge of plumbing, hydraulics, etc. The state of Michigan now requires individuals who are ASSE certified to be **licensed plumbers and provide their date of licensing and apprentice applicants must provide a letter from their employer verifying at least 5 years' experience**, to test in the state of Michigan.

Final Examination of Proficiency Required for Certification

The exam will consist of a 100-question multiple choice written exam and successful completion of the practical (hands on) portion.

Who Should Attend:

The seminar is open to master and journey plumbers, plus registered plumbing apprentices with the State of Michigan. If you have any questions regarding this, please give us a call.

What You'll Get

Upon satisfactory completion, Michigan licensed plumbers & registered apprentices receive a certification for general testing and are qualified to repair, replace, or install backflow devices. However, licensed plumbers must provide their license number and date of the license expiration. Licensed plumbers must have current license to be qualified to repair or replace backflow devices. If the license is expired it must be renewed before you can test or repair.

Complete the application form on the reverse side. The registration fee is \$1,080 for MPMCA members and \$1,385 for nonmembers, which covers the five days of instruction, examination materials, and testing kits for hands on portion. Be sure to bring something to write with. Each class is limited to 20 participants. Registration fee must accompany application form to be considered for acceptance.

Certified Testers will be listed on our website.

For a tester referral, you must provide us with a company name, address, phone number, and county.

If a company name is not provided, your listing will have your first name, last name, certification number, and plumbing license number listed.

Home addresses and home phone numbers are not listed on our website unless you let us know that is what you want for your listing.
